

## OUR VISION

To ensure every man, woman and child in Southern Nevada has access to health care.

## OUR MISSION

To provide quality health care and support for people without access to health care in Southern Nevada within a culture of compassionate caring.

## OUR VALUES: T.R.U.S.T.

**T - Teamwork:** Working with one another as a part of a team, treating fellow staff members with respect and acknowledging that each staff member is a valuable member of the whole.

**R - Respect:** Treating those we serve and with whom we work with compassion, demonstrating a high regard for the dignity and worth of each person.

**U - Urgency:** Working in accordance with the urgency of situations that may arise, making sure matters are prioritized and taken care of in a timely manner.

**S - Service:** Going beyond expectations of one's duties in order to serve our patients in the best way possible.

**T - Transparency:** Being honest and communicating clearly, demonstrating integrity and straightforwardness. Demonstrating the ability to communicate in a way that fosters a shared understanding.

## OUR SERVICES

### *A Culture of Compassionate Caring, Trust and Giving*

Since 2010, VMSN has provided high-quality, comprehensive health care to members of our community who need our help. These individuals are typically low-income earners whose jobs don't include access to health insurance. They make just a little too much each month to qualify for Medicaid, but don't make enough to afford health insurance.

As a nonprofit health organization, VMSN provides care and support at no cost to these individuals who are falling through the cracks of our health system. We are able to do so because of the many caring health care practitioners and other individuals who volunteer their time to help our neighbors in need, and because of the generous financial and in-kind service contributions given each year by businesses, foundations and individuals.

Volunteers in Medicine  
of Southern Nevada

## 2024 FISCAL YEAR AT A GLANCE

### HIGHLIGHTS FROM 2024

**14,083** Total Patient Service Encounters

Completion of Pharmacy Expansion

Launching of the Kirk Kerkorian School of Medicine  
UNLV Community Clinic

### MEDICAL

**8,175** Appointments

**1,385** Unique Patients

**376** Colorectal Screenings

Volunteers in Medicine  
of Southern Nevada

VolunteersinMedLV

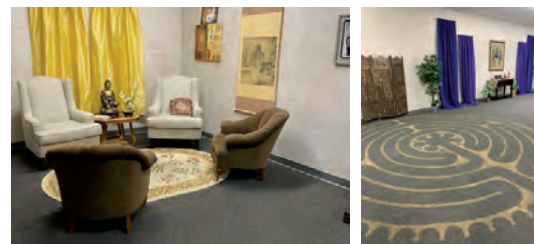

The true measure of a civilization is how willing people are to help others discover their dignity. We rise by lifting others.

My husband produced a documentary called The Spirit of Ubuntu, meaning "I am because we are. We are because I am." It emphasizes our interconnectedness and the positive impact we can have on our communities. VMSN is a reflection of how people can unite to support those in need and create meaningful change.

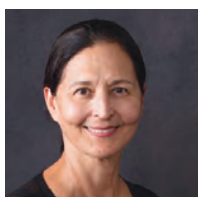

Our free clinic is a medical home, offering wrap-around care, including medical visits, medications, dental services, behavioral health, and social services. But healthcare goes beyond physical care. Mental health, loneliness, and isolation are also critical factors in a person's well-being. Nevada is the loneliest state in the U.S., and loneliness is a significant health determinant. At Volunteers in Medicine, we assess every patient's mental health. To address this, we've launched the Institute of Spirituality and Health Center, offering essential life skills like meditation, yoga, and wellness seminars to build resilience.

Modeled after the Texas Medical Center's Institute of Spirituality and Health, our center provides mindfulness programs for patients and staff to better cope with loneliness and isolation. Research shows that hopelessness negatively impacts health outcomes, and spirituality can be a powerful remedy for depression.

Our Social and Behavioral Health Department regularly evaluates patients for depression, hopelessness, and loneliness, enabling us to better address their overall well-being. Our priority is helping patients achieve and maintain optimal health.

At Volunteers in Medicine, we believe everyone deserves dignity, a sense of belonging, and the opportunity to reach their potential. By providing compassionate care and hope, we help patients discover their true potential. We are proud of our work but are committed to doing more. We invite you to join our dream of a community united by love, compassion, and hope. These values are our North Star.

*Florence Jameson*

**Dr. Florence Jameson**  
*Board Chair and Founder*

It is with great pride that we report VMSN making tremendous strides in 2024. Key advancements that have transformed our wraparound services include 1) the addition of state-of-the-art dental equipment helps us offer more comprehensive and efficient dental services, 2) pharmacy expansion ensures we deliver critical medications for better health outcomes for our patients and learning opportunities for more pharmacy interns, and 3) the launch of free prenatal care services support expectant mothers with proper medical care, reducing the time that babies spend in NICU. These improvements are a direct result of your unwavering support, and together, we are making a profound difference in the lives of those we serve.

# HISTORY OF VMSN

In 2008, a group of visionaries recognized a significant community problem; many southern Nevadans did not have any access to affordable health care. At the time, there were more than 400,000 men, women, and children in Clark County, NV who lacked access to medical treatment. That was about 20% of the Valley's population. Our community needed a solution for our uninsured neighbors in need.

The uninsured are unlikely to have access to health care outside of the emergency room. Uninsured adults are more than 30% less likely than insured adults to have an annual checkup. They often go without screenings and preventative care, and are more likely to be diagnosed with a disease in an advanced stage such as diabetes and hypertension. People with diabetes who do not have health insurance have 60% fewer physician office visits and are prescribed 52% fewer medications than people with insurance coverage—but they also have 168% more emergency department visits than people who have insurance.

After much research and planning, our founders decided to replicate a national model of free care which harnesses the collective will of the community to come together and compassionately serve their neighbors in need. Created in 1994 by Dr. Jack McConnell, Volunteers in Medicine opened its first clinic in Hilton Head, South Carolina. This scalable national model has grown to include 94 Volunteer in Medicine free clinics and is now part of the National Association of Free and Charitable Clinics (NAFC).

Founded in 2008, Volunteers in Medicine of Southern Nevada (VMSN) was created to serve the low-income, uninsured children and adults living in southern Nevada who do not qualify for Medicaid and are unable to afford private health insurance. Even with the advent of health care reform, it is currently estimated that approximately 350,000 Nevadans are still without access to health care.

# MEDICAL SERVICES

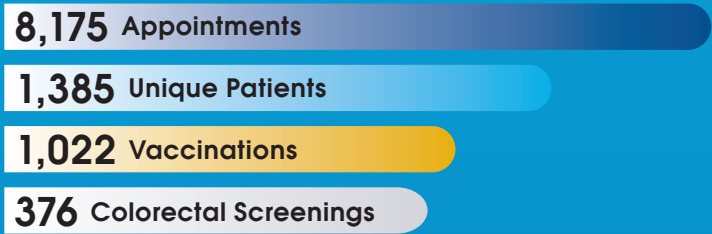

## A CULTURE OF COMPASSIONATE CARING

Our Ruffin Family and Paradise Park clinics provide our patients with adult and pediatric preventative, chronic, and acute primary medical care. We also offer women's care, pediatric checkups and immunizations, colorectal, breast and cervical cancer screenings, and laboratory and imaging services. In addition, we offer on-site specialty clinics in collaboration with a comprehensive network of in-house, referral, and residency program providers.

### FY2024 Medical Service Highlights

### Women's Health

# PHARMACY SERVICES

The pharmacy inside the Ruffin Family Clinic provides eligible patients with access to medications and medical supplies to treat a variety of life-threatening conditions, including diabetes, asthma, heart disease, high cholesterol, hypertension, infections, depression, and other illnesses. In conjunction with the Roseman University School of Health Sciences College of Pharmacy, VMSN offers one-on-one medication management consulting for patients. Additionally, the pharmacy is a training site for Roseman University Intern Pharmacists for 240-hour rotations, and PIMA Pharmaceutical Technicians. They send their students on rotation to be exposed to practical pharmacy practice.

### FY2024 Pharmacy Service Highlights

## DENTAL HEALTH SERVICES

The expanded Ruffin Family Dental Clinic team offers comprehensive oral health care services and includes both full- and part-time professionals. We've strengthened our capabilities by adding a dedicated full-time dentist that allows us to provide a full range of dental services.

The NV Energy Foundation Oral Health Clinic is our newest addition and is strategically located alongside our Paradise Park Medical Clinic. This facility focuses on both pediatric and adult oral hygiene, while the Ruffin Family Dental Clinic specializes in more advanced dental procedures.

We have also introduced cutting-edge technology to our services. Our state-of-the-art 3D printer enables us to craft high-quality upper and lower dentures, as well as custom crowns. The new Planmeca Mill allows for precise milling of porcelain crowns and bridges, significantly enhancing the quality of our restorative services and reducing lab fees. To further improve patient care, we have the Vatech handheld X-ray device, which offers greater convenience and comfort during diagnostic imaging.

Our dental services are provided by a dedicated team of VMSN dental staff and volunteers, with potential future collaborations with UNLV School of Dental Medicine, College of Southern Nevada, and Roseman University. This collective effort ensures the highest standard of care while fostering the development of future dental professionals.

### FY2024 Dental Service Highlights

**12,344** Dental Services

**483** Unique Patients Seen

**1,064** Screenings & Cleanings

**1,497** Cavity & Periodontal Care

**\$1,451,012** Total Value of Services

## SOCIAL & BEHAVIORAL HEALTH INTERVENTION SERVICES

VMSN's Social and Behavioral Health Intervention Services department provides patients with access to care coordination, individual therapy, and group intervention services. Our care coordinators develop patient-centered care plans to connect patients to internal and external resources that will improve their overall health and wellness. Patients are seen for a variety of issues, such as food insecurity, legal concerns, child care needs, transportation barriers, domestic violence, history of trauma, mental health needs, history of substance abuse, and financial insecurity. Our behavioral health team provides individual therapy to assist patients in effectively navigating distress related to depression, anxiety, trauma, grief and loss, and/or daily stressors while developing positive coping tools.

### FY2024 Social & Behavioral Health Intervention Services Highlights

**230** Therapy Appointments

**139** Educational Support Visits

**1,429** care coordination appointments

**1,149** depression screening

# PATIENT TESTIMONIAL

Maria, a 56-year-old woman from Cuba, faced a series of daunting health challenges when she and her husband, Luya, arrived in Las Vegas in 2022 to join their son. Diagnosed with melanoma, pre-diabetes, arthritis, and hypertension, Maria's health seemed overwhelming. However, thanks to the unwavering support of Volunteers in Medicine of Southern Nevada (VMSN), she feels transformed.

From the moment they stepped into VMSN, Maria and Luya were welcomed with warm smiles starting with the Eligibility Department. The medical and social behavioral staff made sure they had everything they needed. "We were welcomed by every person here," Maria recalls. "The providers, staff, and volunteers treated us with respect, love, and kindness."

Despite their numerous health issues, Maria and Luya found solace and exceptional care at VMSN. Maria's pre-diabetes is now carefully managed through regular monitoring, and her melanoma is in remission. The arthritis and hypertension that once plagued her are now under control, allowing her to lead a more productive life.

In addition to managing their chronic conditions, Maria and Luya also received transformative dental care. Thanks to Dr. Ibrahim, VMSN Dental Clinic Director, and his dedicated team, Maria now has partial dentures, and Luya has full dentures. "At VMSN, we even got a new smiles," Maria beams.

The comprehensive and compassionate care at VMSN not only restored their health but also their independence. "Everyone here treated us like family," Maria says. "If it weren't for VMSN's unconditional support and help during our most difficult time moving from Cuba, we would not be able to work." Now, with their health restored, both Maria and Luya have found employment and no longer need VMSN's services, though they remain eternally grateful.

Maria's message to VMSN is one of profound gratitude and encouragement: "Keep up the hard work, and the world will be a great place!"

In Maria's journey, we see the transformative power of community and compassionate healthcare. VMSN provided not just medical support but a lifeline, helping Maria and Luya navigate their new life in Las Vegas with dignity and hope.

## LUYA PEREZ AND MARIA RODRIGUEZ

*Luya and Maria with Dr. Ibrahim*

# VOLUNTEERS

VMSN's service model is a testament to the power of community collaboration. Every volunteer brings unique qualifications to help our patients, whether by providing a diagnosis or offering a friendly welcome at our front desk. Our volunteers come from diverse backgrounds and contribute varied skill sets that are essential to our work across administrative, dental, medical, OBGYN, pharmacy, and social services departments.

Our healthcare professional volunteers enable us to provide life-changing support to patients who need it most. They represent every stage of the healthcare journey, from students, interns, and residents to practicing professionals and recent retirees. Their expertise and empathy empower patients to improve their health.

## FY2024 Volunteer Impact

**500** Number of Volunteers

**20,264** Total Hours

**\$500,000** Total Value

**"Volunteers do not necessarily have the time;  
they just have the heart."**

**- Elizabeth Andrew**

Our volunteers also include community leaders, students, and good Samaritans who want to give back. They assist with patient care by serving as scribes, interpreters, eligibility assistants, and more. These individuals contribute out of the goodness of their hearts, and many are aspiring healthcare professionals themselves, making VMSN an important part of their journey. We are proud to prepare the next generation of healthcare professionals.

## PATIENT TESTIMONIAL

### AUNG HTET AND DAUGHTER, YOON MAY

*Patients since 2024*

Aung and his young family had just escaped the civil war in Myanmar to live with his aunt in Las Vegas when his 9-year-old daughter, Yoon May, complained of breathing difficulty. Deeply concerned and unsure where to turn, Aunt Grace, having heard about Volunteers in Medicine of Southern Nevada (VMSN), urged Aung to seek their help. With guidance from VMSN, they navigated the eligibility process, and soon the entire family became patients.

Yoon May was promptly seen by Dr. Lausanne Orendain, a compassionate volunteer pediatrician at VMSN. Recognizing the seriousness of her symptoms, Dr. Orendain referred Yoon May to the Children's Heart Center. There, in June, she received a diagnosis of Patent Ductus Arteriosus (PDA), a congenital heart defect requiring specialized care.

Not long after this initial visit, Aung found himself back at VMSN with Yoon May, who was now suffering from fever and vomiting. Understanding the urgency, VMSN swiftly arranged for her to receive immediate care at the emergency room. It was a critical moment that highlighted the invaluable support and rapid response that VMSN provides to its patients in times of medical crisis.

Reflecting on their experiences with VMSN, Aung expressed profound gratitude. "VMSN has meant everything to us," he shared earnestly. "Everyone here is so kind and caring, especially towards my daughter. It means a lot because starting a new life in a new country has been incredibly challenging. The respect and support we receive from VMSN make all the difference."

For Aung and his family, VMSN not only offered essential medical care but also a sense of belonging and compassion during a time of upheaval and uncertainty. As they continue their journey in Las Vegas, they find solace in knowing that they have a dedicated community at VMSN standing alongside them, providing both medical expertise and heartfelt support.

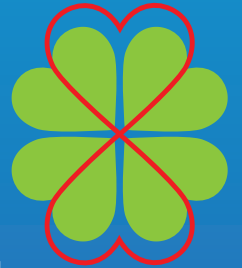

# PHILANTHROPY

Supporters of VMSN not only believe in our vision and mission but also see the value of our services. Good health is priceless. Unfortunately, for so many in our community – good health is out of reach because they simply cannot afford it. It is the generous support of our donors that has led to thousands of patients finally achieving better health by accessing health care services at VMSN.

## FY2024 Philanthropy Highlights

One act of generosity can fund an abundance of health care that positively influences the health and wellbeing of countless patients. Learn more about how you can help by exploring all the different ways to give.

**294** donors  
**\$804,270** gifts & pledges  
**\$1,648,838** grant dollars  
**\$2,239,006** in kind donations  
**80%** on programs and services  
**20%** on management and fundraising

# PATIENT TESTIMONIAL

Originally from Ethiopia, Tigst has called Las Vegas home for nearly 15 years. Before moving to Las Vegas, she worked as an accountant, but here she's been able to work as a casino dealer, which she enjoys. The couple feels especially grateful for VMSN, which has been a cornerstone in their lives for the last year while Tigst was pregnant. From the moment she was just three weeks pregnant, VMSN provided exceptional care. Now, with their baby thriving at six months old, they reflect on their journey with immense gratitude.

"VMSN has been a godsend for us," says Berhanu, Tigst's partner and the baby's father. "The care here has been outstanding, and everyone has been incredibly kind, helpful, and considerate. Given the high cost of healthcare, we honestly don't know what we would have done without this support."

They extend heartfelt thanks to Dr. Jameson and Dr. Buechler for their guidance during the prenatal phase, which ensured both Tigst and their baby stayed healthy throughout the pregnancy. VMSN has made a tremendously positive impact on this new family's lives and they cherish every moment with their bright-eyed little one.

## TIGST ABREHA AND BABY

*Patients since 2023*

Meet Raul, a Las Vegas resident since 2001. Two decades later, Raul and his wife, Guadalupe, celebrate not just their 23-year marriage but a purposeful life they've built with four children and the adoration they reserve for their grandchildren, aged 3 and 1.

Amidst this joyous family life, however, Raul faced a heartbreaking challenge: phantom pains in his legs, remnants of amputations. Until discovering VMSN, his medical care had been limited to necessary surgeries, without the ongoing attention his health demanded. The clinic became a source of hope, where compassionate care merged with professional expertise.

Raul was daunted by being diagnosed with diabetes, hypertension, and high cholesterol as well. However, thanks to VMSN's comprehensive treatment approach that includes medication and education, his health has turned a corner. His A1C levels went from a high of 12.7 to 6.6 within a year, a testament to the efficacy of the treatments and the invaluable diabetes education classes offered by VMSN.

For Raul, VMSN isn't just a clinic; it is the key to his livelihood and emotional wellbeing. "Without the care I receive here, I wouldn't be able to work, and all I would do is suffer at home," he acknowledges with heartfelt sincerity. The clinic's support doesn't stop at medical care; it extends to empowering Raul to get a job and maintain it and contribute to his family's well-being and to society.

Their story encapsulates the essence of VMSN: a sanctuary where compassionate care meets medical excellence, and where every patient, like Raul, finds not just treatment, but a renewed lease on life.
